YAKUPOĞLU A.Ş.

 **YDSBOOTS.COM**

YDS has established its position with an impressive rate of growth, as the primary supplier of military footwear to the largest military force in NATO, meeting the exacting demands of this toughest of customers in all theaters of activity. We have targeted the experience gained in this production to become a major supplier of Military Footwear.

We have invested extensively in research and development, CAD/CAM, various alternative soling technologies and computerized stitching to enable us to stay at the “leading edge” of technical superiority.

Our intention is to maintain the highest quality and performance standards in our products, supported by a significant extension to our in-house laboratory testing facility, enabling us to ensure all materials and processes conform to the European licensing standards.

Our future is indeed bright, so why not share our success and join now in growing list of customers worldwide. Wherever the performance is a priority and foot comfort is required we ensure Your Demand is Satisfied.

Having achieved the valued “Gore-Tex” license to manufacture military footwear, safety and occupational footwear we are confident that this will open up an extensive market for performance products using the technical support of a world brand leader.

A. Vedat YAKUPOGLU
President

FACTORY 1 ◀

FACTORY 2 ◀

WHY YDS?

YDS Boots is a performance driven brand derived from military dynamism providing both customised and off the shelf solutions for professionals in extreme environments.

Our design teams take inspiration from our military heritage to create comfortable and durable solutions for all sectors.

A massive production capacity producing 10K pairs of boots and shoes everyday

An independent SATRA testing laboratory within the factory

Certified to International Standards

ISO 9001:2008 Quality Management System

ISO 14001:2004 Environmental Management System

TS 18001:2008 Occupational Health and Safety Management System

YDS TECHNOLOGY

DUAL DENSITY RUBBER SOLING TECHNOLOGY

DDR is a unique rubber soling formula designed for the toughest working environments, and ensuring a lightweight and comfortable wear experience all day long and beyond.

- Tough nitrile rubber outsole with SRC slip resistance rating
- Air injected into the rubber creates a lightweight cushioned midsole for maximum comfort and superior shock absorption
- Highly durable formula outlasting PU alternatives
- Heat resistant sole to 300°C
- Injected to the uppers, unlike most soles, ensuring the best bond possible
- Minimizes the effects of hot and cold surfaces to the wearer's feet hence keeping them warm during winter and cool during summer.

GORE-TEX® FOOTWEAR TECHNOLOGY

GORE-TEX® Footwear is ideal for a wide range of activities. These products are engineered to keep feet dry and protect them by being durably waterproof, breathable and providing optimized climate comfort.

- Long-lasting quality that is industry proven
- Versatile footwear lowering procurement cost for employer
- Reduces job-related accidents, injuries and illnesses
- Adaptable for multi-climate conditions
- Perspiration is pulled away from the feet, keeping them dryer from the inside
- Quick-drying fabric keeps feet warm and more comfortable

GORE-TEX, GTX, Gore and designs are trademarks of W. L. Gore & Associates. ©2011 W. L. Gore & Associates GmbH.

For further details please revert to GORE-TEX® Footwear Technology Section.

L-PROTECTION TECHNOLOGY

L-Protection composite textile insoles are designed to provide increased safety and comfort as a new generation nail-proof textile insole.

- Resists penetration even by small diameter nails
- Greater protected surface area of the foot (than steel midsoles)
- Zero traceability by metal detector
- Maximum flexibility and comfort and greater foot sensitivity and comfort
- Greater ground adherence
- Minimum weight
- Thermo and electric isolation.

PU-RUBBER SOLING TECHNOLOGY

Combines the lightweight, shock absorbing properties of PU with a durable, heat resistant, high-grip rubber outsole. This sole offers flexibility and an athletic feel and is suitable for most industrial work areas.

SOLAR SHIELD TECHNOLOGY

Leather is specially treated to help keep the foot cool despite the effects of strong direct sunlight.

The treatment reinforces the leather's natural properties by reflecting sunlight away from the boot as well as helping the leather retain its colour properties.

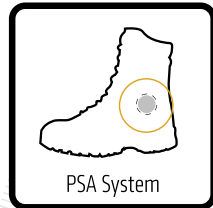

SLIP RESISTANCE - C RATING

An advanced European slip resistance test to standard EN ISO 13287:2007. The sole unit is tested for slip resistance on ceramic tile wetted with dilute soap solution and on smooth steel with glycerol.

Marking symbols and specifications			
Marking	Footwear slip resistant on	Minimum Coefficient of Friction by ENISO13287:2007	
		Forward heel slip	Forward flat slip
SRC	Ceramic tile with SLS* and Steel with Glycerol	0.28 0.13	0.32 0.18

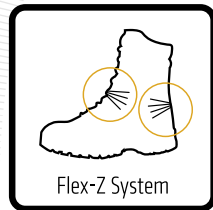

*water with 0.5% sodium lauryl sulphate

YDS SYSTEMS

POLYCARBONATE SHOCK ABSORPTION ANKLE PROTECTION SYSTEM

A protective polycarbonate disk backed with special foaming, designed to protect the outer ankle area by absorbing the impact.

FLEX-Z SYSTEM

Flexible areas specifically positioned in the front and/or rear of the boot for optimal flexibility and ease of movement.

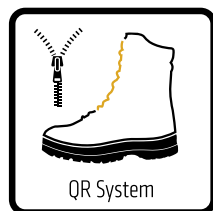

NIP LINE CUT RESISTANCE SYSTEM

The leather at the nip line above the sole unit is reinforced with a specialist cut resistant strip running 35mm above the nip line to protect from punctures and lacerations.

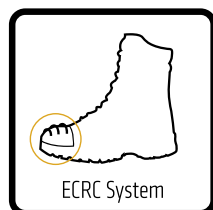

MUD GUARD SYSTEM

An additional layer of material protects the uppers from the effects of mud and dirt to ensure good durability.

QUICK RELEASE SYSTEM

A YKK zipper attached to the lacing system assures secure fixing during wear and helps to aid rapid donning and removal when required.

EXTREME CONDITION RIGID CAP SYSTEM

A distinctive ridged cap to reinforce the toe cap area and enhance the durability of the footwear.

LOCK AND GRIP LACING SYSTEM

LG Lacing System not only provides better flexing of the sides of the boots for better support to feet and ankle but also allows for easy fastening and pressure distribution

GORE-TEX® FOOTWEAR TECHNOLOGY

GORE-TEX® Footwear is ideal for a wide range of activities

These products are engineered to keep feet dry and protect them by being durably waterproof, breathable and providing optimized climate comfort.

- Long-lasting quality that is industry proven
- Versatile footwear lowers procurement cost for employer
- Reduces job-related accidents, injuries and illnesses
- Adaptable for multi-climate conditions
- Perspiration is pulled away from the feet, keeping them dryer from the inside
- Quick-drying fabric keeps feet warm and more comfortable

Constructions:

The GORE-TEX® laminate is combined with other high-quality fabrics to create uniquely specified footwear. All components (leathers, textile, laces, foams and threads) as well as the entire shoe construction are application specific and uniquely tailored for the end use. All shoes and boots are subjected to rigorous quality inspections.

GORE-TEX® Insulated Comfort Footwear

Dry & Comfortably warm

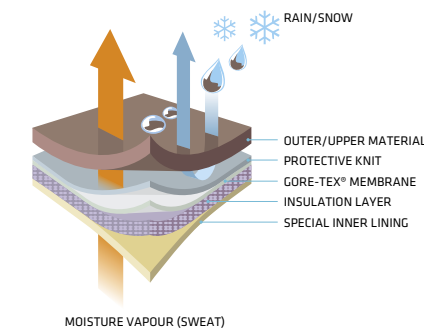

GORE-TEX® Insulated Comfort Footwear keeps feet dry, warm and protected by being durably waterproof and breathable and is an engineered system which provides leading climate comfort. It is ideal for cold conditions and winter outdoor activities.

GORE-TEX® Insulated Comfort Footwear:

- Durably waterproof and breathable
- Optimized climate comfort
- For cold to very cold conditions
- For a wide range of outdoor activities
- For maximum heat retention

Detailed Description:

GORE-TEX® Insulated Comfort Footwear is designed for use in rain, snow and cold weather. It is durably waterproof, highly breathable and equipped with an appropriate layer of insulation for the intended use. All components, the insulation and the shoe construction itself, are geared towards maximum performance and subjected to regular quality inspections.

GORE-TEX® Extended Comfort Footwear

Dry & Comfortably cool

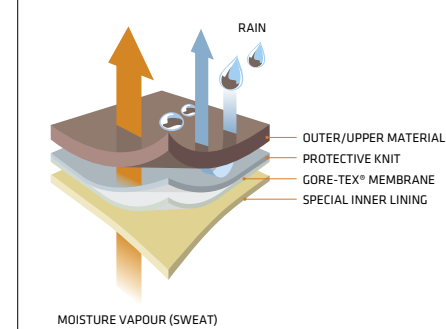

GORE-TEX® Extended Comfort Footwear keeps feet dry and protected by being durably waterproof and breathable and is an engineered system which provides leading climate comfort. It is ideal for moderate and warmer conditions and during higher activity levels.

GORE-TEX® Extended Comfort Footwear:

- Durably waterproof and breathable
- Optimized climate comfort
- For moderate and warmer conditions
- During higher activity levels
- For indoor and outdoor use
- Non-insulating for lowest heat retention

Description:

GORE-TEX® Extended Comfort Footwear is durably waterproof and extremely breathable. Combined with low insulation it ensures optimized climate comfort even in moderate and warmer conditions. GORE-TEX® Extended Comfort Footwear is perfect for constant changes between indoors and outdoors, walking and working. For maximum performance all components and the shoe construction itself are tuned precisely to each other and subjected to regular quality inspections.

GORE-TEX® Performance Comfort Footwear

Dry & Comfortable

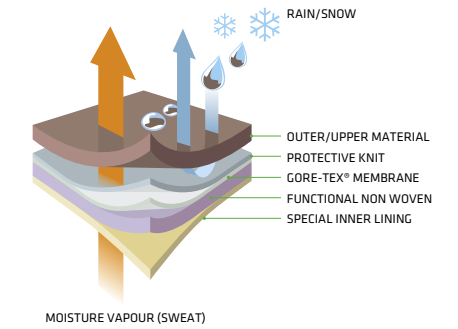

GORE-TEX® Performance Comfort Footwear keeps feet dry and protected by being durably waterproof and breathable and is an engineered system which provides leading climate comfort. It is ideal for a wide range of conditions and outdoor activities.

GORE-TEX® Performance Comfort Footwear:

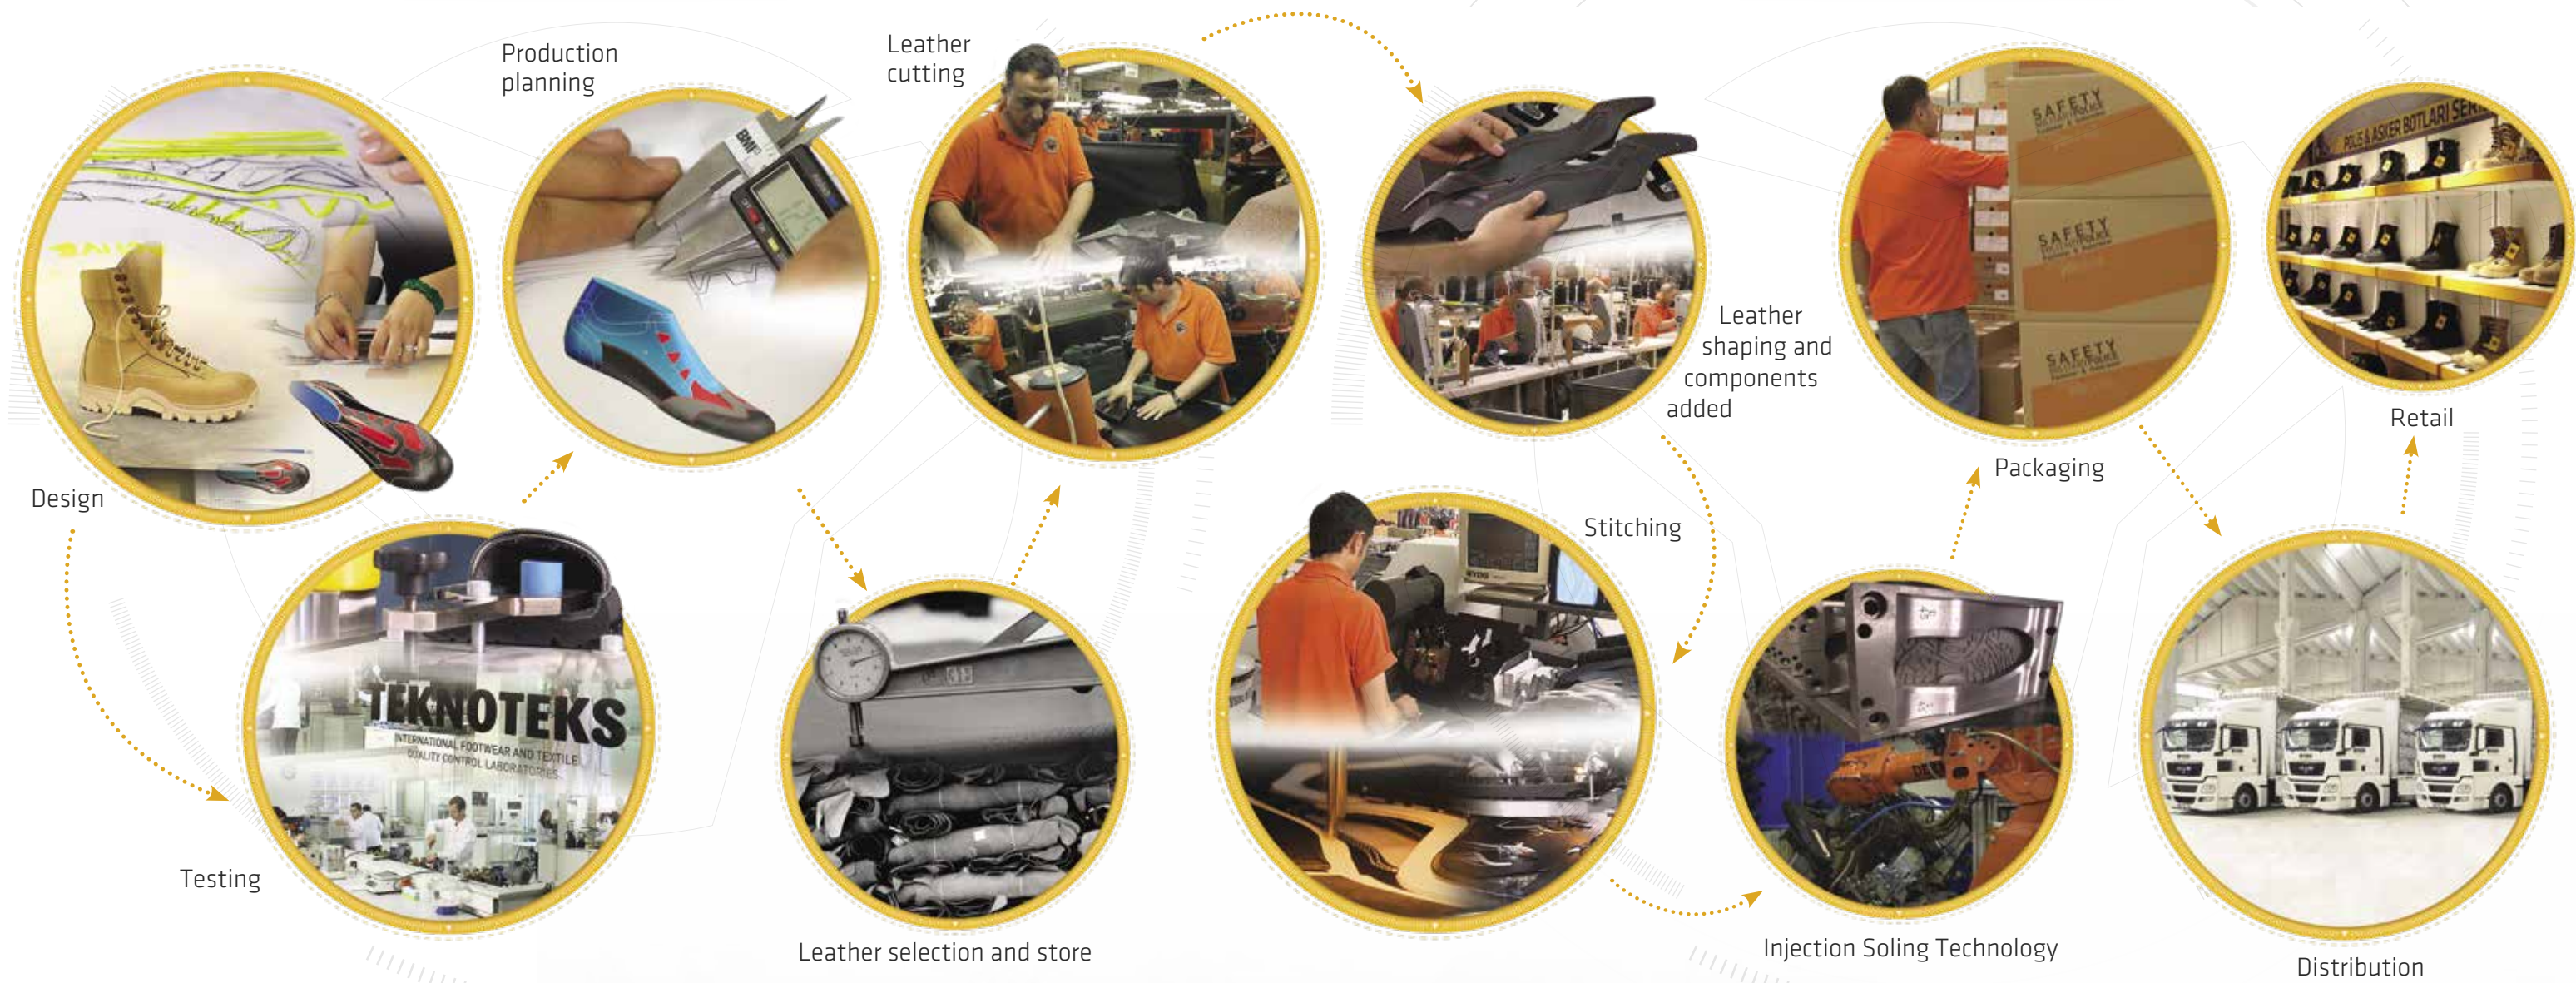

- Durably waterproof and breathable
- Optimized climate comfort
- For moderate conditions
- For a wide range of outdoor activities
- Moderately insulating for nominal heat retention

Description:

GORE-TEX® Performance Comfort Footwear is designed for a wide range of outdoor activities. All the materials used, from the sole to the shaft, are selected with the greatest of care and combined in a perfectly-fitting shoe. GORE-TEX® Performance Comfort Footwear is not only durably waterproof and breathable, it is also robust and hardwearing, giving you maximum protection and comfort no matter how long and demanding the work.
